Jupiter Energy Limited (ASX: "JPR") presents the following update on activities for the 3-month period ending 30 June 2025 (the "Quarter"). Also included in this report are details of any subsequent events that have occurred up to the date of this release.

The Quarter in brief:

During the Quarter oil production was in line with expectations. All production wells are operating under their Full Commercial licences. Oil sales are subject to a monthly domestic quota that is set by the Kazakh Ministry for Energy. Oil produced outside this domestic quota allocation can be sold through other channels, including into the export market.

2Q 2025 Oil Sales:

During the Quarter, unaudited oil sales revenue (including VAT) totalled ~\$US1.8m (~\$A2.8m) based on sales of ~47,000 barrels of oil (average price of ~\$US38/bbl).

Cash receipts for the Quarter were ~\$A3.01m. The variance between revenue recognised and cash receipts is due to the timing of the receipt of oil prepayments that are then amortised over one to two months of oil deliveries.

Approximate production of oil, by field, for the Quarter, was as follows:

- Akkar North (East Block): **9,600 barrels** (production from J-50)
- Akkar East: **26,100 barrels** (main production from wells J-52 and 19)
- West Zhetybai: **11,300 barrels** (production from J-58)

Domestic Oil Sales:

Oil sales during the Quarter were made through the Joint Venture vehicle, Jupiter Energy Trading LLC. Oil was sold into the Pavlodar refinery and unaudited oil sales revenue (including VAT) totalled ~\$US0.7m (~\$A1.09m) based on sales of ~17,000 barrels of oil (average price of ~\$US41/bbl).

Mini Refinery Oil Sales:

During the Quarter, oil that was not subject to the domestic quota allocation set by the Kazakh Ministry of Energy, was sold to a local mini refinery.

Unaudited oil sales revenue (including VAT) totalled ~\$US1.1m (~\$A1.71m) based on sales of ~30,000 barrels of oil (average price of ~\$US37/bbl).

Export Oil Sales:

There were no sales of oil into the export market during the Quarter.

The Company continues to monitor the export oil pricing formula being offered by traders and will revert to this sales channel when the net price achieved is superior to pricing being offered via other available domestic sales channels.

As is required under ASX disclosure rules, the Company confirms that it currently holds the following licence:

The Company continues to operate under an approved Operations Budget using the net revenues from prepaid oil sales. The Company expects to remain funded at an operational level based on current and forecasted oil production, under differing well production scenarios, for the foreseeable future.
